University of Pisa
PhD Programme in Agriculture, Food and Environment

SUSTAINABLE AGRICULTURE AND FOOD SYSTEMS IN A CHANGING WORLD

Science, policy and global challenges

When climate rewrites the rules, growing and feeding becomes a global challenge. Young researchers are ready to meet it!

16 PhD stud. speeches
3 international Key-notes

3 *thematic sessions*

Farming Systems & Resilience
"How can we move from pressure to resilience by redesigning farming systems to safeguard essential resources?"

Crop Protection & Sustainability
"How do we protect and feed crops without destroying the environment?"

Food Systems & Interdisciplinarity
"How can a food systems approach create connections across disciplines to address complex food challenges?"

1 *final round table*

Agri-Food Systems in a Changing Geopolitical Context

"How can scientific research and public policies help agri-food systems adapt to global complexity and geopolitical trade shifts?"
